Excel Case Study — Financial Data Cleaning, Modern Lookup Functions & Dynamic Cash Tracking

TOTAL REVENUE	TOTAL INCOME	TOTAL EXPENSE	NET PROFIT
₹1,114,800	₹645,700	₹469,100	₹176,600

01. Raw Data Cleaning & Advanced Formulas

1. Modern Dynamic Array Formulas

- **XLOOKUP Integration:**Automated voucher metadata cross-referencing without legacy VLOOKUP restrictions:
  `=XLOOKUP($K2, $A$2:$A$12, $H$2:$H$12)`
- **UNIQUE Function:**Extracted distinct party names and categories dynamically from raw transaction logs:
  `=UNIQUE(F4:F12)`

2. Transaction Clearing Logic

- **Payment Status Automation:**Categorized ledger settlements into Cleared or Pending based on payment receipt dates:
  `=IF(ISBLANK(B2), "Pending", "Cleared")`
- **Accounting Formatting:**Formatted raw currency values into standardized INR accounting layout with clean headers.

02. Interactive Dashboard Architecture

Interactive Slicers

Allows executive filtering by transaction type, settlement status, and category:

- **Type Slicer (Expense, Income)**
- **Status Slicer (Cleared, Pending)**
- **Category Slicer (Admin, Direct, Marketing, Revenue)**

Key Visual Highlights

- **Cash Settlement Donut Chart:**Real-time comparison between cleared and pending payments.
- **Daily Cash Trend Line:**Line chart plotting daily cash fluctuations across dates.
- **Category Revenue Bar Chart:**Breakdown across Consulting Fees, Sales Revenue, Software Licenses, and Digital Ads.

03. Cash Settlement Breakdown

Settlement Reconciliation Status (Total Volume₹1,114,800)

CLEARED AMOUNT	PENDING AMOUNT
₹549,700 (49%)	₹565,100 (51%)
