Excel Case Study — Logistics Status Tracking, SUMIF Analytics & Pivot Engine

TOTAL REVENUE	DELIVERED	DELAYED	PENDING
₹53,856,000	12	4	2

01. Data Logic & Formulas

1. Automated Dispatch Status Logic

- **Dispatch Status Formula:** Automated delivery tracking using nested logical conditions:

```
=IF(ISBLANK(K2), "Pending", IF(K2<=J2, "Delivered", "Delayed"))
```

- **Conditional Audit:** Flagged delayed shipments vs expected delivery dates for logistics optimization.

2. Data Aggregation & SUMIF

- **Dynamic Summary Tables:** Combined standard formulas with Pivot Tables for accurate count tracking:

```
=SUMIF($B$6:$C$21, $A$3, $C$6:$C$21)
```

- **City-wise Revenue Summary:** Aggregated revenue across Delhi, Agra, Ghaziabad, Jaipur, and Lucknow.

02. Transporter & Regional Analytics

Interactive Slicers

Multi-dimensional filtering controls for operational review:

Transporter Slicer (Blue Dart, Delhivery, Mahindra, Safexpress, TCI, V-Xpress)

City Filter (Agra, Delhi, Ghaziabad, Jaipur, Lucknow)

Key Visual Breakdown

- **City Revenue Bar Chart:** Top performer Delhi (₹17.35M) and Agra (₹9.78M).
- **Dispatch Status Pie Chart:** Real-time split of Delivered, Delayed, and Pending shipments.
- **Customer-wise Sales:** Target tracking across B2B clients (GreenTech EV, SunPower, Nexus Motors).

03. Regional Logistics Summary

City-Wise Total Revenue & Dispatch Output (Total Units: 2,900)

DELHI	AGRA	GHAZIABAD	JAIPUR	LUCKNOW
₹17,355,000	₹9,785,000	₹9,844,000	₹8,870,000	₹8,002,000
